Decorative

GRANDIS STONE architectural department was established in order to assist the customer to make the right decision for natural stone materials depend on projects properties. Services of this department are as following:

Design and architectural consulting

Design division is ready to propose interior & exterior design with stone materials based on different architectural styles in accordance with wide range of customers' needs.

As built drawing

As built survey team, by engaging the most advanced technology and device, prepare the precise cutting plans, according to the usage, installation point, deformities, arcs and etc.

Shop drawing

Technical division, based on as-built drawings, prepare the stone plates in accepted scales, cross checking dimensions, coding the cut parts based on installation plan(s). Subsequently, this process improves the quality of executive operations and reduces waste materials.

Construction supervision

Supervision team, have complete control over the preparation and installation of the stone material(s) during the project implementation period, to ensure the best possible result, regardless of the complexity of the project.
